

MY SLOT NOTES

RESULT = Robert E Sult
For the best reSULT conSULT SULT

GEN 2 Printers

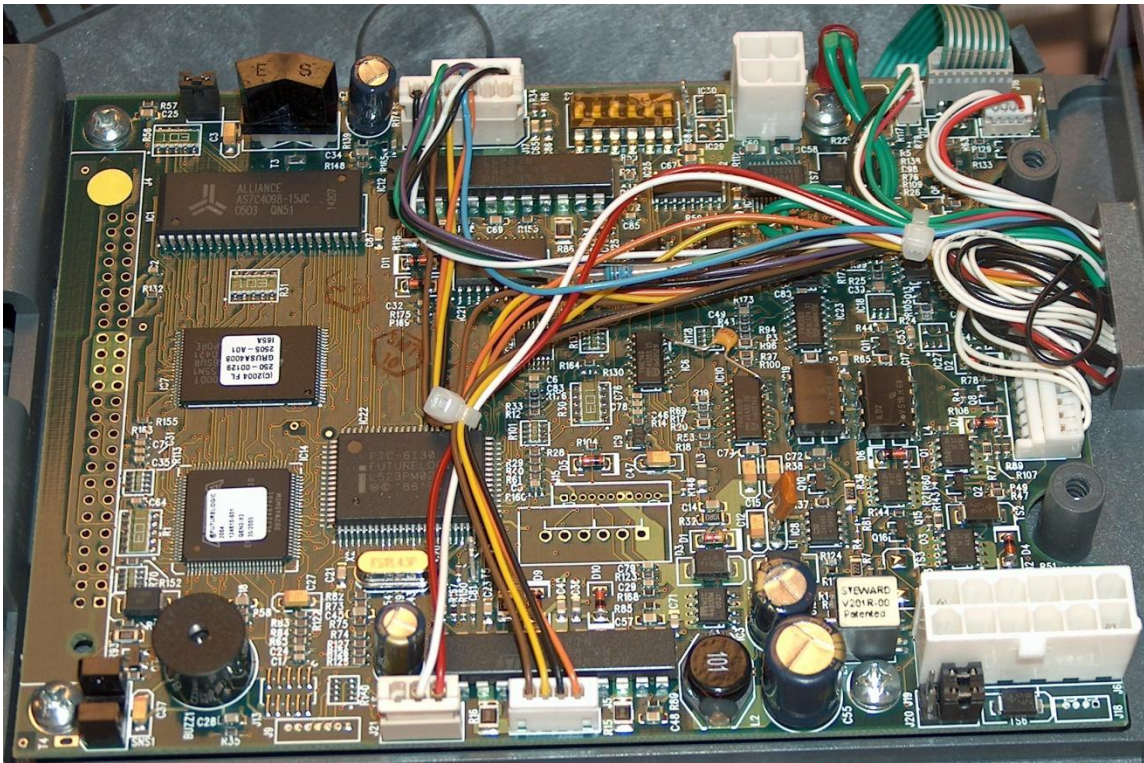

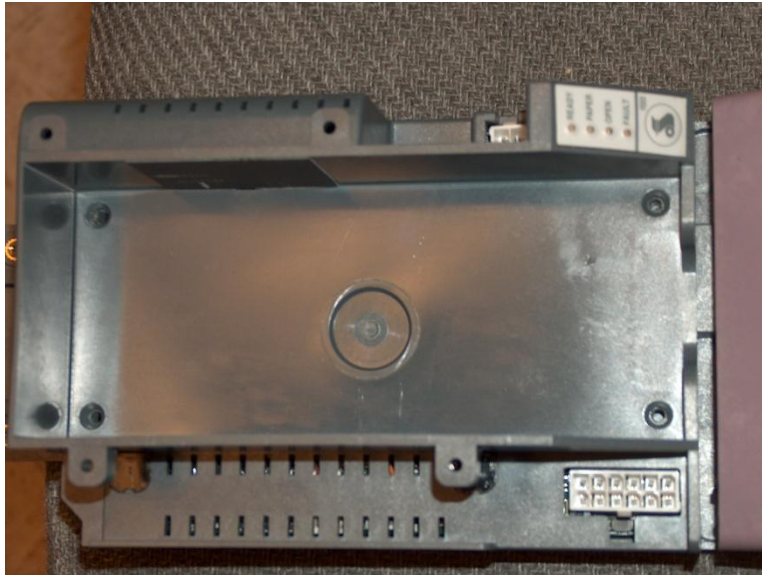

Did you know – if you had a Gen 2 Netplex but needed an RS232 or Vice versa?

It's easy to make the change.

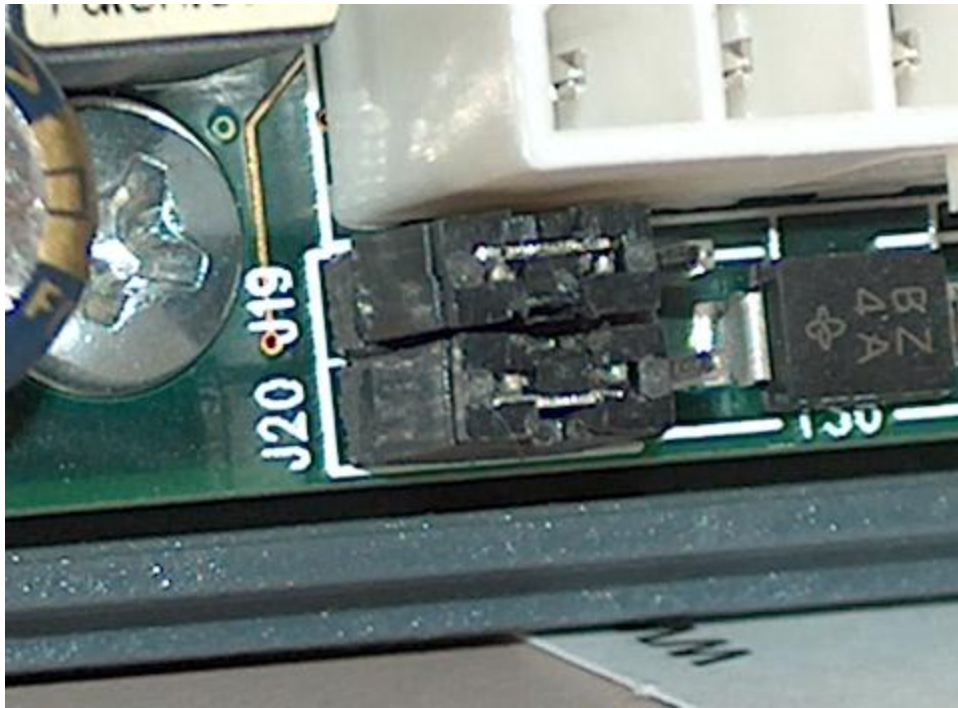

1)

Remove the 4 screws – lift the plastic cover (Caution – watch out for the ribbon cable)

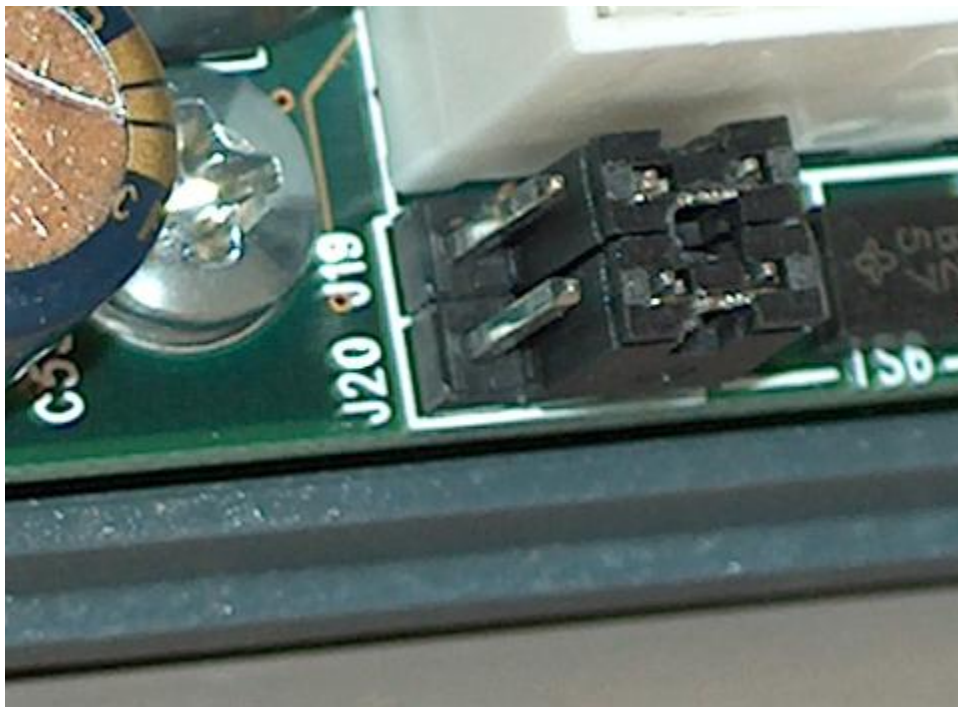

Both boards are the same – if you look at the 2 jumpers (J19 – J20) on the bottom right – of this picture.

This one is set for NETPLEX

For an RS232 – Just move the Jumpers – to the right (Like the photo below)

Insure you have the correct firmware

Thank you - Mike & Richard from the Tropicana
