

MY SLOT NOTES

RESULT = Robert E Sult
For the best reSULT conSULT SULT

KRISTEL LCD

This LCD would look good once turn on; the problem was it would then black out.

By removing tow (2) of Cold cathode (2 out of 6), the LCD would remain on once turned on.

Have one on the casino floor – with 4 out 6 Cold Cathode's working – Parts on order and will be fixed soon. Did not see much difference in brightness with two of the CCLF unplugged.
